Wienerberger
Glazed Bricks

Get creative with **bold and beautiful** glazed bricks

Explore the eye-catching design potential of a high gloss facade finish with the Wienerberger glazed brick range.

With both a core range of glazed bricks and the option to create your own bespoke design, Wienerberger offers the versatility you need to deliver projects that are creative, colourful and inspired.

Not only do glazed bricks create a stunning effect, but their high gloss ceramic finish also protects the brick, meaning that the brickwork is easy to maintain and durable in a variety of weather conditions. Both beautiful and practical, Wienerberger glazed bricks will ensure that the finished structure stays vibrant and true to the original design for the lifetime of the building.

Why use glazed bricks?

Popular in both exterior and interior design during the Victorian and Edwardian periods, glazed bricks share the inherent design versatility we enjoy with standard bricks, allowing for architects and designers to bring an extra flourish to a scheme.

Exterior glazed bricks can be used for a full facade to create an impressive and impactful structure, or to used selectively to draw the eye to specific building features.

So whether you are looking to achieve a bold modern look or pay tribute to historic Victorian or Edwardian architecture, we have a glazed brick option to help you reach your design goals.

**“COLOURS, TEXTURES,
BRIGHTNESS LEVELS AND METALLICS:
THE POSSIBILITIES ARE ENDLESS.”**

In addition to the core range, our bespoke glazed brick offers endless possibilities for creating a unique facade design.

By collaborating with us you can create glazed bricks in bespoke shapes, sizes and colours. We can even provide our special shaped brick range with a fully customised glazed face to match standard sized bricks for a seamless effect on the facade.

Our glazed bricks are available in two powerful and inspiring ranges: **Crystal** and **Pearl**. Each has its own character and is manufactured as extruded bricks.

Looking to create a statement facade with a glazed brick finish? Our Crystal range of high specification facing bricks features a spectrum of 12 opaque shades, including brights and neutrals.

The Pearl collection offers a palette of colours from bold and vibrant to subtle and understated.

Available in 9 captivating shades, these high specification facing bricks of unrivalled quality feature a slightly translucent and high shine glaze for a soft and radiant effect. The Pearl collection offers a palette of colours from bold and vibrant to subtle and understated.

CREATING STRIKING HIGH RISE STRUCTURES

Inspired by the waterfront high rises of Manhattan and Chicago, Glenn Howells Architects used the eye-catching shine of glazed bricks to achieve a cosmopolitan, international appeal on the London City Island development at Leamouth Peninsula in East London.

PUTTING STYLE BACK INTO THE HIGH STREET

After a decline in popularity of Swansea's tired high street, this regeneration project by Coastal Housing Group had the ambition of once again making this area the commercial heart of the city.

The Swansea Urban Village project created new retail units for the High Street as well as Wales' first 'Creative Cluster', as part of a residentially led city centre mixed use regeneration.

ADDING LUSTRE BOTH INSIDE AND OUT

Yotel London City is a 4 star hotel situated within the creative hub of Clerkenwell, so its design had to pack an extra punch, whilst also representing the Yotel brand and cohesively sitting alongside local architecture.

BRINGING LUXURY TO AFFORDABLE HOUSING

The Wardroper House affordable housing project in the evolving Elephant & Castle area of London used contrasting textures on its facades - glazed bricks solely on the ground floor of the building, with timber cladding on the above floors.

ENHANCING BEAUTIFUL HOMES

Green with a sheen was the chosen effect for this eye-catching double storey extension at a home in Zurenborg, Belgium.

Design and technical **services**

Wienerberger's Design Services Department offers specialist design and technical expertise, providing effective and helpful advice to achieve successful brickwork.

The services offered range from guidance on the most appropriate product selection for particular projects and applications through to final product specification including current building standards and codes of practice, special shaped bricks, bond patterns, movement joints and brickwork detailing.

A comprehensive knowledge of special shaped bricks combined with the use of CAD software enables us to assist in detailing customer requirements where Wienerberger bricks have been specified.
