

**Inspired by
the elements**

Designed by
Wienerberger

Wienerberger has been a world leader in the manufacture and supply of clay bricks for over 200 years, and with 229 plants across the globe, we are committed to investment in people, products and innovation.

Terca is the facing brick brand of Wienerberger. With the largest range of bricks in the world, Terca offers the widest choice of colours, textures and sizes to match and blend with existing brickwork or to create unique new buildings.

A sustainable environment

Sustainability is a passion at Wienerberger and we continually improve our operations to exceed minimum legislative requirement and with investment in technology and research we are limiting our impact on the environment.

We work with the Carbon Trust and within the EU Emissions Trading Scheme to reduce the energy we use and our raw material consumption, reducing our CO₂ emissions.

All Wienerberger manufacturing sites in the UK are accredited to the BS EN ISO 14001 Environmental Management System. We use recycled water, water collected from adjacent quarries and rainwater harvesting within the production process and our brick range contains nearly 20% recycled materials under the MARSS scheme (Materials from Alternative, Recycled and Secondary Sources). We are also reducing our energy requirements by generating 90% of our electricity on or near Wienerberger sites.

Innovation
that stands
the test of
time.

New beginnings

New product development is a major focus for Wienerberger. Through research, and after much investment in plant and technology in the UK, we are proud to introduce nine new sustainable bricks bringing increased diversity to the Terca range.

Originating from our Todhills factory, these exciting new soft mud bricks are manufactured to the highest quality with sustainability in mind and are certified to BES 6001 the responsible sourcing of construction materials standard, which is independently certified by CICS, (Complete Integrated Certification Services).

Each of the bricks is readily available in 65mm. Additionally, due to the investment at Todhills they are also available in 50mm and 73mm sizes on a made to order basis. Please contact our customer service centre on 0845 303 2524 for more information.

ISO 14001 &
ISO 9001 Certified (UK)

BS EN 771-1:2003

Bring warmth and permanence to any build project.

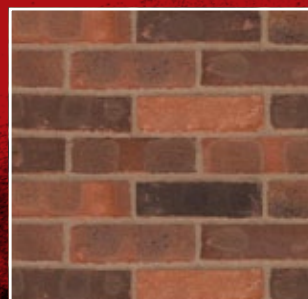

Weathered Stock

Using tried and tested manufacturing processes and incorporating new materials, we have designed two new weathered soft mud products to enhance our stock brick offering.

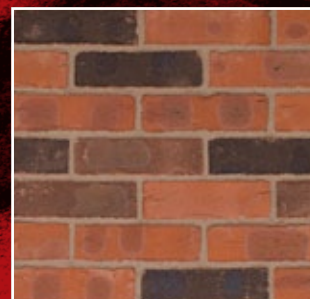

A black weathering effect is applied to the face creating added depth and age to the finish. This makes them ideal for new housing projects where a mature appearance is desired, to blend with existing buildings or to bring warmth and permanence to new commercial projects.

Ashington Red Multi incorporates rich red hues, with the black weathering adding mellow character.

Westerton Orange Multi reflects vibrant antique orange tones beneath the black weathered finish.

Ashington Red Multi

Westerton Orange Multi

	TYPE	LOCATION	SIZETOLERANCE		DURABILITY	ACTIVE SOLUBLE SALTS	COMPRESSIVE STRENGTH (N/mm ²)	WATER ABSORPTION (%)	PACK QUANTITY	TYPICAL PACK WEIGHT (kg)
			MEAN	RANGE						
Ashington Red Multi	S	Todhills	T1	R1	F2	S2	≥20	≤14	500	1207
Westerton Orange Multi	S	Todhills	T1	R1	F2	S2	≥20	≤14	500	1238

Handformatic

The Terca range offers the largest selection of handformatic bricks in the UK. These feature the texture and creased appearance of traditional handmade bricks and are a popular choice for new build and renovation projects alike. These four new colours enhance the range and allow even more options for design and build. The light weathered finish makes them perfect for new builds of any size.

Newfield Multi encompasses subtle light red tones with a lightly weathered appearance for a traditional look.

Bradfield Multi brings deep, warm red notes into play with the weathered appearance for an established finish.

Highfield Cream is highly sustainable with a high MARSS content and with its light iron spotting, unique buff tones and lightly weathered surface is the perfect complement to Newfield Multi and Bradfield Multi.

Eastfield Grey is manufactured using a high MARSS content giving this brick excellent sustainability credentials. A consistent through colour grey brick with a slightly darker hearting, its hand creased styling and lightly weathered finish creates a dramatic statement for any build.

Even more options for your build.

Newfield Multi	S	Todhills	T1	R1	F2	S2	≥20	≤14	500	1204

Waterstruck

Wienerberger has invested in new technology at Todhills to bring an innovative new process to the marketplace, creating bricks that emulate traditional waterstruck styling.

This exciting new brick range launches initially with three versatile colours that are set to become popular for all kinds of build.

These bricks take advantage of latest manufacturing techniques, with the addition of a small frog, making them easier to lay and lighter to handle than traditional waterstruck bricks.

Heartland Red Multi is a fiery red with a natural blue heart and waterstruck texture that brings a unique new look to housing and commercial projects alike.

Heartland Light Multi reflects light reds and oranges and has a natural soft hearting, creating a bright, fresh finish.

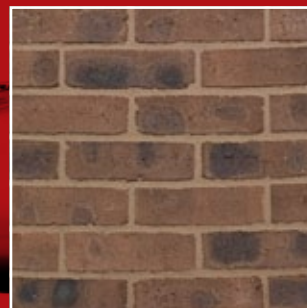

Heartland Brown Multi combines dappled mid brown tones with a natural dark hearting to bring a surprisingly warm finish to traditional and contemporary architecture.
